**(Stock Code: 00991)**

## **OVERSEAS REGULATORY ANNOUNCEMENT ANNOUNCEMENT ON THE COMPLETION OF ON-GRID POWER GENERATION FOR THE YEAR OF 2023**

### **SPECIAL NOTICE**

The board of directors and all directors of the Company warrant that there are no false representations and misleading statements contained in, or material omissions from this announcement, and severally and jointly accept the responsibility for the truthfulness, accuracy and completeness of the contents of this announcement.

This announcement is made pursuant to Rule 13.10B of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Datang International Power Generation Co., Ltd. (the “**Company**”) announces that, according to the Company’s preliminary statistics, as of 31 December 2023, the total on-grid power generation of the Company and its subsidiaries amounted to approximately 259.4265 billion kWh, representing an increase of approximately 5.06% on a year-on-year basis, of which:

| <b>Category</b>    | <b>On-grid power generation for the year of 2023 (billion kWh)</b> | <b>Year-on-year change</b> |
|--------------------|--|----------------------------|
| Coal-fired         | 192.5100   | 4.10%                      |
| Gas turbine        | 19.2505  | 33.12%                     |
| Hydropower         | 29.5572  | -10.30%                    |
| Wind power         | 14.0780  | 16.53%                     |
| Photovoltaic power | 4.0308   | 60.03%                     |
| Total              | 259.4265   | 5.06%                      |

The major reasons for the change in on-grid power generation of the Company are:

1. Due to the year-on-year increase in the electricity demand of the whole society and the impact of local weather in summer and winter, the on-grid power generation of thermal power for the year experienced a year-on-year increase;
2. In the first half of the year, due to the shortage of water inflow in the drainage basin where the hydropower generation units of the Company are located, the on-grid power generation of hydropower recorded a year-on-year decrease; in the second half of the year, the water inflow for hydropower stations improved as compared to the same period last year, and the overall decline in hydropower generation narrowed significantly as compared to the first half of the year;
3. The installed capacity of wind power, photovoltaic power and thermal power and gas turbine continued to increase, and the on-grid power generation of clean energy of the Company experienced a relatively large year-on-year increase.

As of 31 December 2023, the average on-grid tariff of the Company was RMB466.41 per MWh (tax inclusive), representing an increase of approximately 1.22% year-on-year. In 2023, the market-based transaction volume of electricity of the Company was approximately 229.128 billion kWh, accounting for approximately 88.31% of the total.

Details of the on-grid power generation of the Company and its subsidiaries are set out as below:

| Area                        | Category                                   | Company name  | On-grid power generation for the year of 2023 (billion kWh) | Year-on-year change |
